Summary

I am a front-end developer specializing in HTML5, CSS3, and modern JavaScript (ES6+), with strong expertise in React and Next.js for building scalable, high-performance web applications. I work extensively with styling frameworks such as Bootstrap 4/5, Tailwind CSS (v3/v4), Shadcn UI, Aceternity UI, Hero UI, and Magic UI to create clean, responsive, and accessible interfaces.

I have hands-on experience using Vite for small to medium-sized projects and single-page applications, and I have worked with Vue.js where appropriate. For large, enterprise-scale applications requiring a structured, maintainable codebase and team collaboration, I prefer Angular.

On the backend side, I have working knowledge of Supabase, Convex, Neon, and MongoDB for designing reliable data layers, authentication flows, and database-driven applications. I value clean architecture, clear communication, and delivering intuitive user experiences with measurable impact.

Experience

Cleantouch Software Corporation Intern – Jr. Frontend Developer (Promotion)	FB Area Block 2 Azizabad Block 8 Gulberg Town, Karachi 2021 – 2023
Crystallite Pak Pvt Ltd Jr. Frontend Developer → Frontend Developer (Promotion)	1210,1212 , National IT Park. Main Shahrah-e-Faisal Rd 2023 – 2024
Bitswits PVT LTD Front End Developer	1210,1212 , National IT Park. Main Shahrah-e-Faisal Rd 2024 – 2025
SYSARTX Software Company Senior Frontend Developer	Plot B 43, Block 4A Block 4 A Gulshan-e-Iqbal, Karachi April 2025 – Present

Education

Skills

HTML5

Structuring web content using the latest HTML standards.

CSS3

Styling web pages with advanced CSS techniques, including animations and responsive design.

Bootstrap 4 & 5

Building responsive, mobile-first web applications using Bootstrap's CSS framework.

Tailwind CSS (v3/v4)

Utility-first CSS framework for rapid custom design.

JavaScript (ES6 & ES6+)

Writing dynamic, interactive web pages with modern JavaScript features

ReactJS

Building efficient, scalable user interfaces using React's component-based architecture.

NextJS

Framework for building server-side rendered React applications with optimal performance.

Framer Motion

Creating smooth animations and transitions in React applications.

MongoDB

NoSQL database for managing and querying large datasets in web applications

jQuery

Simplifying HTML document traversal and manipulation, as well as event handling

Responsive Web Design

Designing web applications that adapt seamlessly to different screen sizes.

Cross-Browser Compatibility

Ensuring consistent look and functionality of web applications across various browsers

UI/UX Design Principles

Designing intuitive and user-friendly interfaces focused on enhancing the user experience.

Git / Github

Managing project code history and collaborating with teams using Git.
